

SUSTAINABLE FUTURE FOR BASF AND ZELFO TECHNOLOGY

January 2013

BASF and Zelfo Technology cooperate on joint fibre program.

An exciting new relationship between BASF and Zelfo Technology has been cemented by the signing of an agreement between the two parties in Basel, Switzerland.

The agreement concerns the industrialisation of Zelfo processing technology for the efficient and cost-effective production of a superior micro-fibrillated cellulose. Specific interests lie in Paper and Pulp production for BASF and non-VOC emitting binders and bio-composite based applications for Zelfo Technology itself.

Further information:- See Joint press release PDF [P111e-BASF-Zelfo Technology_2013](#)
